Authorisation for Veterinary Treatment

Cat(s) Name:

In the event that my cat requires veterinary treatment during its stay at Fairways Boarding Cattery, I have discussed and given consent for Kirsty Durrell to take the following action :

- To contact our nominated vet for advice and instruction should my cat become ill during the period of stay.
- To contact her registered vet (Medivet, Minster) for advice, in the event that she is unable to get in touch with our vet.
- For our vet to examine my cat and perform any investigations that are deemed necessary (i.e. blood tests, x-rays).
- To administer any medication/treatment as prescribed/advised by our vet.
- For our vet to perform euthanasia if recommended on humane grounds and after consultation with myself, unless immediate action is crucial for the welfare of the cat.
- To consult our vet if fleas, ticks or worms are present on my cat during its stay and to administer an acceptable flea/worm treatment if advised ok to do so by our vet. I understand that this may be a product recommended by our vet and not necessarily the one I use, unless I have stated otherwise (ie allergic to a particular brand).
- I understand that should any of the above be necessary, the full costs will be payable by me to either the vets or Fairways upon my return.

Signed Date

This Authorisation will apply to the cat(s) named above from the first day of boarding for up to 1 year.
